

# System.Reflection.TargetParameterCount Exception Class

```
[ILASM]
.class public sealed serializable
TargetParameterCountException extends
System.ApplicationException

[C#]
public sealed class TargetParameterCountException :
ApplicationException
```

## Assembly Info:

- *Name:* mscorlib
- *Public Key:* [00 00 00 00 00 00 00 00 04 00 00 00 00 00 00]
- *Version:* 1.0.x.x
- *Attributes:*
  - CLSCompliantAttribute(true)

## Summary

Represents the error that occurs when the number of parameters passed in the invocation of a member does not match the number of parameters required by the contract of that member.

## Inherits From: System.ApplicationException

**Library:** Reflection

**Thread Safety:** All public static members of this type are safe for multithreaded operations. No instance members are guaranteed to be thread safe.

## Description

This exception is thrown by types in the Reflection Library, when attempting to dynamically invoke members.

# 1 TargetParameterCountException()

## 2 Constructor

```
3 [ILASM]  
4 public rtspecialname specialname instance void .ctor()  
5 [C#]  
6 public TargetParameterCountException()
```

### 7 Summary

8 Constructs and initializes a new instance of the  
9 **System.Reflection.TargetParameterCountException** class.

### 10 Description

11 This constructor initializes the  
12 **System.Reflection.TargetParameterCountException.Message**  
13 property of the new instance to a system-supplied message that  
14 describes the error, such as "Parameter count mismatch." This  
15 message takes into account the current system culture.

16  
17 The  
18 **System.Reflection.TargetParameterCountException.InnerException**  
19 property of the new instance is initialized to **null**.

20

# 1 TargetParameterCountException(System. 2 String) Constructor

```
3 [ILASM]  
4 public rtspecialname specialname instance void .ctor(string  
5 message)  
6  
7 [C#]  
8 public TargetParameterCountException(string message)
```

## 8 Summary

9 Constructs and initializes a new instance of the  
10 **System.Reflection.TargetParameterCountException** class.

## 11 Parameters

12  
13

Parameter	Description
<i>message</i>	A <b>System.String</b> that describes the error. The content of <i>message</i> is intended to be understood by humans. The caller of this constructor is required to ensure that this string has been localized for the current system culture.

14

## 15 Description

16 This constructor initializes the  
17 **System.Reflection.TargetParameterCountException.Message**  
18 property of the new instance using *message*. If *message* is **null**, the  
19 **System.Reflection.TargetParameterCountException.Message**  
20 property is initialized to the system-supplied message provided by the  
21 constructor that takes no arguments.

22

23 The  
24 **System.Reflection.TargetParameterCountException.InnerException**  
25 **tion** property is initialized to **null**.

26

# 1 TargetParameterCountException(System. 2 String, System.Exception) Constructor

```
3 [ILASM]  
4 public rtspecialname specialname instance void .ctor(string  
5 message, class System.Exception inner)  
  
6 [C#]  
7 public TargetParameterCountException(string message,  
8 Exception inner)
```

## 9 Summary

10 Constructs and initializes a new instance of the  
11 **System.Reflection.TargetParameterCountException** class.

## 12 Parameters

13  
14

Parameter	Description
<i>message</i>	A <b>System.String</b> that describes the error. The content of <i>message</i> is intended to be understood by humans. The caller of this constructor is required to ensure that this string has been localized for the current system culture.
<i>inner</i>	An instance of <b>System.Exception</b> that is the cause of the current Exception. If <i>innerException</i> is non-null, then the current Exception was raised in a catch block handling <i>innerException</i> .

15

## 16 Description

17 This constructor initializes the  
18 **System.Reflection.TargetParameterCountException.Message**  
19 property of the new instance using *message*, and the  
20 **System.Reflection.TargetParameterCountException.InnerExcep**  
21 **tion** property using *inner*. If *message* is **null**, the  
22 **System.Reflection.TargetParameterCountException.Message**  
23 property is initialized to the system-supplied message provided by the  
24 constructor that takes no arguments.

25

26 [Note: For information on inner exceptions, see  
27 **System.Exception.InnerException**.]
