

# 1 System.Security.Permissions.PermissionState

## 2 Enum

```
3 [ILAsm]  
4 .class public sealed serializable PermissionState extends System.Enum  
5 [C#]  
6 public enum PermissionState
```

### 7 Assembly Info:

- 8 • *Name:* mscorlib
- 9 • *Public Key:* [00 00 00 00 00 00 00 00 04 00 00 00 00 00 00 00]
- 10 • *Version:* 2.0.x.x
- 11 • *Attributes:*
  - 12 ○ CLSCompliantAttribute(true)

### 13 Summary

14 Represents a value specifying whether an entity, at creation, should have full or no  
15 access to resources.

### 16 Inherits From: System.Enum

17

18 **Library:** BCL

19

### 20 Description

21 [*Note:* Code access permission objects supply a constructor that takes a  
22 System.Security.Permissions.PermissionState value specifying that the new  
23 instance is either fully restricted  
24 (System.Security.Permissions.PermissionState.None) or unrestricted  
25 (System.Security.Permissions.PermissionState.Unrestricted). A fully restricted  
26 permission object disallows access to a resource; an unrestricted permission object  
27 allows full access to a resource. For example, a fully restricted  
28 System.Security.Permissions.FileIOPermission object disallows access to files and  
29 directories, while an unrestricted object of the same type allows full access to all files  
30 and directories in the file system.

33

# 1 PermissionState.None Field

```
2 [ILAsm]  
3 .field public static literal valuetype  
4 System.Security.Permissions.PermissionState None = 0  
  
5 [C#]  
6 None = 0
```

## 7 Summary

8 Specifies access to the resource protected by the permission is not allowed.

9

# 1 PermissionState.Unrestricted Field

```
2 [ILAsm]  
3 .field public static literal valuetype  
4 System.Security.Permissions.PermissionState Unrestricted = 1  
  
5 [C#]  
6 Unrestricted = 1
```

## 7 Summary

8 Specifies full access to the resource protected by the permission.
