## 33 Description

34 The System.Collections.Generic.Dictionary<TKey,TValue>.Values property  
35 returns an instance of this type, containing all the values in that dictionary. The order of  
36 the values in the value collection is unspecified, but it is the same order as the  
37 associated values in the key collection returned by the  
38 System.Collections.Generic.Dictionary<TKey,TValue>.Keys property.

1  
2  
3  
4

If the underlying dictionary is modified, or the value of any key in that dictionary is modified, the behavior of the value collection is unspecified.

7 System.Collections.Generic.Dictionary`2<!2,!3> dictionary)  
  
8 [C#]  
9 public ValueCollection(Dictionary<TKey,TValue> dictionary)
```

10 **Summary**

11 Initializes a new value collection to reflect the values from the specified dictionary.

12 **Parameters**

Parameter	Description
<i>dictionary</i>	The dictionary whose values are to be reflected in the value collection.

13  
14 **Exceptions**

Exception	Condition
<b>System.ArgumentNullException</b>	<i>dictionary</i> is null.

5 .method public hidebysig void CopyTo(!2[] array, int32 arrayIndex)  
6 [C#]  
7 public void CopyTo(TValue[] array, int arrayIndex)
```

8 **Summary**

9 Copies the elements of the value collection to a `System.Array`, starting at a particular  
10 index.

11 **Parameters**

Parameter	Description
<i>array</i>	A one-dimensional, zero-based <code>System.Array</code> that is the destination of the elements copied from the value collection.
<i>arrayIndex</i>	The zero-based index in <i>array</i> at which copying begins.

12  
13 **Description**

14 The elements are copied into the array in the same order in which the enumerator  
15 iterates through the value collection.

16 **Exceptions**

Exception	Condition
<b>System.ArgumentException</b>	<i>array</i> is multidimensional. -or- <i>array</i> does not have zero-based indexing. -or- <i>arrayIndex</i> is greater than the length of <i>array</i> . -or-

	<p>The number of elements in the value collection is greater than the available space from <i>arrayIndex</i> to the end of the destination <i>array</i>.</p> <p>-or-</p> <p>Some element of the value collection is not assignable to the element type of the array.</p>
<b>System.ArgumentNullException</b>	<i>array</i> is null.
<b>System.ArgumentOutOfRangeException</b>	<i>arrayIndex</i> < 0.
